

Brew card

Coffee to water, by weight — weigh both, don't use scoops. From the demo vault's coffee pages.

Default: 55 g coffee per litre $\approx$ 1 : 18

Gold Cup standard for filter coffee. National norms run from ~55 g/L (US) to ~63 g/L (Norway).

Per brewer

Brewer	Method	Grind	Ratio	Time
V60	pour-over, paper	medium-fine (table salt)	1 : 15 – 1 : 17	~4:00 incl. 30–40 s bloom
Chemex	pour-over, thick bonded paper	medium	~1 : 18	3–4 min
French press	immersion, metal mesh	coarse	~1 : 18	4 min (4–7)
AeroPress	immersion + hand pressure	—	—	~30 s press
Moka pot	steam pressure, metal basket	—	—	—
Espresso machine	pressure, metal basket	fine	—	seconds

Quick amounts at 1 : 18

Water	250 g	350 g	500 g	750 g	1000 g
Coffee	14 g	19 g	28 g	42 g	55 g

If it tastes wrong

- **Weak or sour** → grind finer (more extraction).
- **Harsh or bitter** → grind coarser.
- Right strength but off taste → it's extraction, not the ratio: fix the grind, not the dose.
- Change one variable at a time.

Example data from the karpathy.app demo vault (pages brew-ratio, grind-size and the brewer pages). “—” = the vault's sources don't say.
